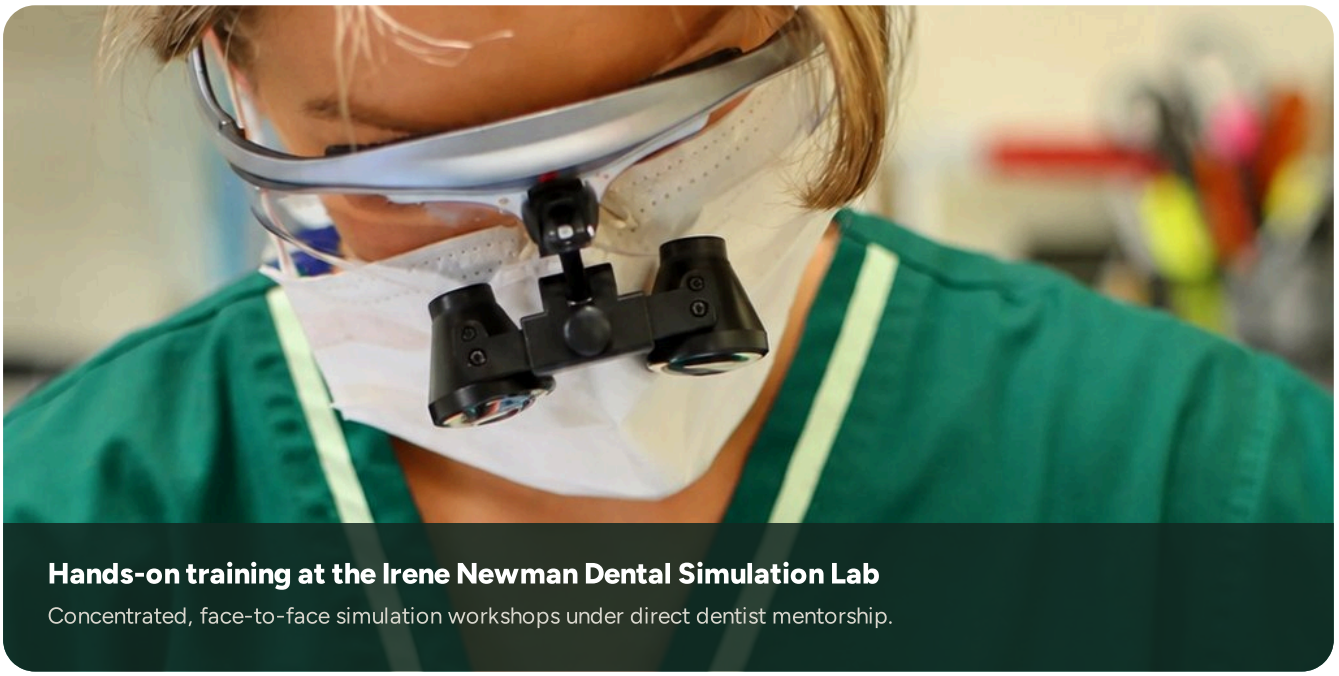
Bridge theory and real-world patient care

Master your skills in a safe, dentist-supported environment using state-of-the-art phantom heads and advanced VR simulation technology, bridging the gap between theory and real-world patient care.

Build exceptional clinical confidence through hands-on placements across primary and secondary care settings. You will treat diverse communities, master real-world workflows, and drive local oral health improvement.



Hands-on training at the Irene Newman Dental Simulation Lab

Concentrated, face-to-face simulation workshops under direct dentist mentorship.

FOUR REASONS TO CHOOSE THIS PATHWAY

01

Official 2-Year Higher Diploma in Dental Hygiene

Fully accredited *Técnico Superior en Higiene Bucodental* 2,000+ curriculum hours qualification.

02

Interactive Hybrid Residency Model

Integrate live digital seminars and monthly practical residencies leading to full clinical immersion totalling 1,000+ practical hours.

03

Enhanced EU Curriculum

Embracing the official Spanish Ministry syllabus framework, proactively enhanced to include the extended scope of Dental Hygienists.

04

100% English Instruction

Professional qualification delivered, examined, and clinically mentored entirely in English.

A practical course at EPSUM, Madrid

EPSUM, *Escuela Profesional Superior de Madrid* (Madrid Graduate School of Professional Studies), located in the centre of Madrid with a 43,000+ square-foot campus featuring state-of-the-art facilities, is a Spanish Ministry of Education-accredited college specialising in healthcare qualifications.

It features a dedicated dental hygiene programme that combines face-to-face and online interactive learning, VR simulation training, and supervised clinical placement.

The English-language Higher Diploma begins with live online theoretical lectures and monthly high-density campus blocks at EPSUM's Irene Newman Dental Simulation Lab, rounded off by dedicated supervised clinical placement at EPSUM's outreach dental clinics and a final professional project.

The Interactive Hybrid Residency Model

Achieving an elite healthcare qualification should not require compromising your current role or family commitments from day one. Our intelligently structured curriculum offers a seamless transition into the dental hygiene profession, allowing you to master advanced clinical theory from the comfort of your home country during the foundational stages of your training.

YEAR 1 The Foundational Immersion

Live Digital Academy

WEEKLY EVENINGS / WEEKENDS

Engage in real-time, interactive theoretical lessons delivered live by lecturers who are dentists with teaching qualifications. This synchronous format mirrors the academic rigour of an on-campus lecture while preserving your weekly schedule.

High-Intensity Campus Residencies

1 WEEK PER MONTH IN MADRID

Translate your digital theory into elite muscle memory. Travel to EPSUM's state-of-the-art campus for concentrated, face-to-face simulation workshops and practical training under direct dentist mentorship.

YEAR 2 Advanced Practice & Clinical Mastery

Continued Professional Flexibility

LIVE SEMINARS & MONTHLY RESIDENCY

Maintain your established routine during the third semester with our proven live seminars and monthly residency structure in Madrid as your practical scope expands.

Elite Clinical Placement

EPSUM OUTREACH CLINICS

Transition to full immersion within EPSUM's dedicated outreach clinics in Spain. Accumulate comprehensive patient care hours to compile an unassailable clinical portfolio supervised entirely by practising dentists.

> Master advanced clinical theory from home, then transition to full clinical placement in Spain, building a heavily documented portfolio of real patient care.

A robust dual-framework curriculum

Our English programme is anchored directly within the highest standards of European vocational education. All modules are delivered and assessed by lecturers who are experienced dentists holding the postgraduate Master's Degree in Teaching (*Máster en Formación del Profesorado*).

01 **Official Spanish National Core**

The full, official syllabus regulated by the Spanish Government Ministry of Education: *Ciclo Formativo de Grado Superior en Higiene Bucodental*. This ensures your qualification carries authentic legal and state recognition.

02 **Dental Hygienist Scope Enhancement**

Specialised modules aligned directly with the comprehensive extended scope of dental hygienists, so you graduate with the clinical capabilities, terminology, and procedural knowledge expected in pan-European dental practices.

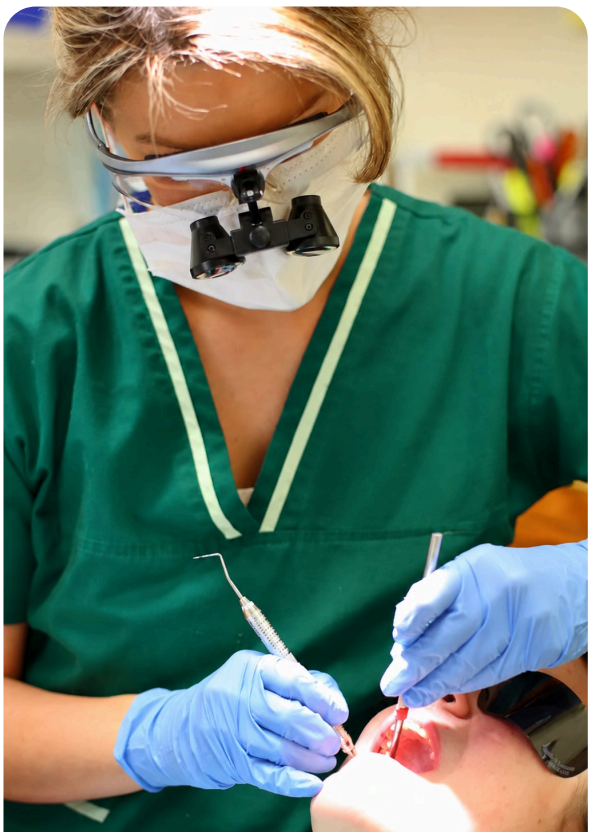
03 **Dentist-Led Supervision**

Every lecture and clinical rotation is directed and logged by experienced dentists, guaranteeing elite clinical standards throughout your training.

LEARNING & ASSESSMENT

This integrated programme teaches the scientific pathology of dental disease alongside real-world patient management. Learning is driven by live lectures, small-group seminars, clinical mentoring, and digital modules, supplemented by student research and peer presentations.

Your knowledge, skills, and professionalism are measured continuously through formative and summative testing. Assessment encompasses written exams, clinical case reports, practical and online tests, projects, portfolios, competency sign-offs, oral presentations, and practical clinical examinations.



Secure your place

Entry Requirements

- High School Diploma or recognised international equivalent
- A-Levels: Full GCE or IGCSE Advanced Level (min. 2 passes)
- International Baccalaureate: IB Diploma
- BTEC Extended Level 3 Diploma
- Access to Higher Education Diploma

Applicants must also pass an admission interview. Those whose entry qualifications were completed in a non-native English-speaking country must demonstrate language competency. Please contact our admissions team for a tailored list of accepted certifications.

Tuition Fees

€11,000*

Total fees for the 2-year programme.

Monthly instalment plans available from €650 / month, allowing you to fund your education seamlessly alongside your current career.

*Non-EU students should budget an additional €800–€1,200 for administrative & document-processing expenses, including apostille, sworn translations and homologation.

FREQUENTLY ASKED QUESTIONS

"Can I continue working during the first year of the course?"
Yes. The first year is specifically designed for working professionals. Theoretical modules are taught online on evenings / weekends, meaning you only need to arrange travel to Madrid for one intensive practical week each month.

"What exactly makes this curriculum 'enhanced'?"
While you study the official Spanish government framework (the *Ciclo Formativo de Grado Superior*), we have embedded supplementary clinical modules ensuring you are fully proficient in specific diagnostic, therapeutic, and preventative procedures that align perfectly with the pan-European dental hygienists scope of practice.

"How does the clinical placement work in Year 2?"
In your second year, you will complete clinical placement in Spain within EPSUM's dedicated outreach clinics. You will treat patients under the direct supervision of dentists, establishing an undeniable, heavily documented portfolio of your practical expertise.

Bridge the Training Gap.
Secure Your Clinical Future.

To maintain an elite student-to-dentist ratio in our course and outreach clinics, places for our English-speaking cohort are strictly limited. Take control of your career trajectory today.
